

MERCHANT PROCESSING MADE EASY

Accept PIN based transactions

Give your customer the
convenience to withdrawal money
in your store.

WHY US?

The Perfect Fit

Our Point of Banking system is designed to work with your customer's bank and ATM/debit cards, giving them access to their cash and allowing them to spend more inside your store. Our machines are similar to standard credit card processing machines. The difference is the terminal is loaded with a custom software program so it only runs PIN based transactions with a small convenience fee that the cardholder pays. This fee serves to pay for the processing costs incurred, while making extra money for the merchant!

FULFILL YOUR BUSINESS NEEDS

Maximize your outreach to customers

Here are some of the benefits of our Point of Banking system:

- No operating costs. No credit card or debit card fees!
- Earn money on each transaction.
- Does not require merchant to change from current bank.
- Eliminates the liability of a cash ATM machine! Cashless system is safe and secure!
- Quick and easy approval process.
- Give customers the ability to withdraw money from their accounts to spend in your store.

SERVICE IS KEY

How it works

Our terminals run PIN based transactions and any eligible card with a PIN can be used. The amount is pre-set by the merchant so you can control the amount of cash that is kept at your register.

Your business is secure

We protect your financial information with industry-leading security and fraud prevention systems. We do not share customer's personal information.

Keep your customers happy

Quality is a key in any business. Reward your customers with superior service. The result? Loyalty. Customers will be more likely to come back if you meet their needs.

All the features you want, in a space-saving size. With the Vx 510, debit and credit card payments and value-added applications are efficiently processed. The internal PCI PED approved PIN pad ensures the highest security standards. Maximized performance and the integrated high-speed thermal printer keep your customers moving. Available in dial up and Ethernet options.

PRODUCT DETAILS

Great Function

- Efficient processing and high speed thermal printer keep checkout lines on the move
- Multitasking memory supports bank cards and value-added applications like loyalty or gift cards
- Vertical, triple-track card reader provides quick read rates and accepts all magnetic-stripe cards
- ATM-style interface, large backlit display, ergonomic keys and bold prompts reduce errors

Amazing performance

- Simple to install and easy to use
- Printer designed for easy paper loading virtually eliminating jams
- Supports external PCI PED approved PIN pad, like the PINpad 1000SE
- PCI PED approval ensures compliance with the most stringent security standards
- Supports additional capabilities like check reading, check imaging and contactless payments

Made For Small Businesses

- The latest, most reliable advances in security to give small businesses invaluable peace of mind
- Superior performance for fast dial-up transaction processing
- Small size keeps your countertop free of clutter and full efficiency

High speed printer reduces consumer wait time.

Slim design is hand-over friendly.

Backlit display and bold menu prompts make it easy to use.

Multi-tasking memory provides more flexibility in accepting loyalty or gift cards.

Check reading and check imaging provide high functionality – simply add a peripheral by connecting to the back of the terminal.

EQUIPMENT

Verifone VX-510 Terminal

- Merchants can offer a wide range of customer service options with the VX 510. This countertop solution comes in a sleek, compact design, and offers dynamically-managed memory for seconds-fast processing.
- The VX 510 offers built-in connectivity options (dial or Ethernet), expanding your future business options. Transactions are secure with PCI PED approval.

Verifone VX-570

- It has flexible options: built-in support for dial and an option for combining dial and Ethernet. Merchants with broadband service already installed can immediately process payments through the always-on connection.
- The VX 570 countertop solution offers outstanding performance by combining superior speed and power for quick and reliable payment processing, along with increased memory to support multiple value-added applications. Arrives ready for seconds-fast processing and plenty of memory for multi-application capabilities.

EQUIPMENT

VeriFone VX610

- The VeriFone VX610 provides a solution for wireless processing. Its powerful processor and flexible design makes the VeriFone VX 610 one of the best wireless terminals on the market.

VeriFone 1000SE PIN Pad

- Offer consumers the security of PIN entry payments. VeriFone's best-selling PINpad 1000SE is a versatile solution that combines a peripheral solution for PIN-based transactions in one handheld product. An inexpensive, secure, and reliable PIN pad for payment processing.
